

Protect Your Critical Assets, Data, & Operations

# RESULT

AppGuard provides the strongest endpoint security to spotlight the integrity of this business to its existing and potential customers.

- Full security with ZERO downtime during and following deployment.
- Constant monitoring for safety of activities such as new app installations
- Employees and customers are assured that their data and information is safe.

# INDUSTRY

A new financial services business was building its operational infrastructure and needed the best *proactive* endpoint protection it could find to guard against malware and ransomware.

# CHALLENGE

The business owner wanted to reassure existing and potential customers that their financial data and information would be secure.

Financial services firms are common targets for cyber attacks. Neither the firm nor its small business customers can afford the damaging effects of a breach.

# SOLUTION

AppGuard is the solution to provide the very best in endpoint protection. Due to its unique structure, AppGuard stops what AV, EDR, or XDR miss or detect too late.

AppGuard boosts detection tools, so that they are more focused. It allows defenders to accomplish more with what they have.

# APPGUARD

## AFFORDABLE PROTECTION

No need for additional skilled staff or dedicated budgets. AppGuard is a first-layer defense that seamlessly integrates without “breaking the bank.”

## STRENGTHENS EXISTING DEFENCES

Which Anti-Virus is best? It doesn't matter. AppGuard boosts EVERY anti-virus option with its distinctly different design and approach to defeating malware.

## EASY – STEALTH

### 24/7/365

AppGuard Enterprise expert installation and system service is fully supported. It is a lightweight agent that has no impact on system speed or performance.

## ENDURING TRUSTED

### PERFORMANCE

Numerous examples across multiple industries for entities of all sizes to demonstrate the stopping of what AV missed - - phishing, malware, ransomware, weaponized documents, and banking trojans.

*The best indication that we made the right choice with AppGuard is that nothing bad is happening. No incidents. No warning messages.*
